

Features

- Centering boss and locating hole for accurate positioning.
- Operating range of table is 0°~190° by angle adjusting screw.
- Compact design using double rack and single pinion.
- Hollow shaft standard for wiring and piping.
- Possible to fit shock absorbers as stops.
- Ease of mounting with integral table.

Sensor switch (※4)	RT: Reed switch, RTN: NPN, RTP: PNP					

※1. The maximum operating pressure of the actuator is restricted by the maximum allowable thrust of the shock absorber.

※2. No-load conditions.

※3. Be careful if the rotation angle of a type with internal shock absorber is set below the value in the table below, the piston stroke will be smaller than the shock absorber's effective stroke, resulting in decreased energy absorption ability.

※4. RT specification, please refer to page 5-14.
